

SAURA LED Solar dark grey beacon lamp

Ref. 70774

SAURA LED is a solar beacon for outdoor lighting. This luminaire has a PIR motion sensor that regulates the intensity of light depending on the presence of people around. To turn it on or off, simply press its button for 3 seconds until the blue indicator turns on or off. It is a perfect lamp to illuminate passage areas at the entrance of homes or in the garden, because it regulates only the light level according to the presence of people in movement. During the day it stays off in charging mode; at night it projects a dim light until it detects someone around, at which point it emits the total of its light. It can be installed as a beacon or as a stake.

Specifications

Bulb: SMD LED 2.2W 150Lm 3000K

Bulb included: Yes

Transformer:

Transformer included: Yes

IP: 54

Class: III

Material: Aluminium
