## Maintenance

Aluminium  
Protect surfaces with barrier  
elements like film, paper, and  
peelable lacquers before  
placement and handling.  
If accidental contamination or  
splashing of strong alkalis or  
acids occurs, wash the affected  
area with a large amount of  
clean water, especially cut-outs  
or holes and cavities.

Teak  
We recommend treating the  
wood with sealer every three  
months, or more frequently in  
the case of hotel and catering  
establishments. To restore the  
teak to its original appearance,  
sand the entire surface and  
apply the sealer.
